Data and email Transfer from old system	No	£48 inc VAT	Included

Our packages are designed around making your new machine work securely out of the box. Many computers are sold nowadays missing updates, poorly configured and with very little support. We don't think you would buy a car dirty, low on fuel, oil and water, so why should a computer be sold similarly unprepared.

Our standard package includes the things needed by most people, we patch and prepare your machine prior to you using it. For a more hands on setup at your home we offer an enhanced package, which has extra services included.

Prices for the installation part of the enhanced package are for local deliveries and exclude extensive time on-site beyond one hour. If you don't live local to us, please check for a quote.
